

Futures Algorithmic Trading Capabilities and Offering

Our Futures Algorithmic Trading Platform offers innovative low latency strategies, combined with a high-touch trading desk, to help clients achieve execution objectives.

Key Differentiators

Thoughtfully Designed

Built from scratch for Futures instead of replicated from Equity algos

Tailored Strategies

Tailored towards client execution objectives and applies Custom Order-Placement Model

Insightful Reporting

Custom TCA-detailed order level and aggregate transaction cost analytics to understand and optimize execution behavior

Dedicated Customer Service

Desk Intelligence supports execution algos

Strategies that Support Futures Trading

Implementation Shortfall (IS)

- Targets the arrival price and attempts to optimize market impact against opportunity cost tradeoff by intelligent order placement and short-term microstructure indicators
- Intelligent, selective front-loaded trajectory to reduce risk and capture short-term price reversion
- Algo selects optimal duration for execution to reduce risk
- Client controlled urgency parameter to control algo aggressiveness

VWAP/TWAP

- Enables custom volume profiles, real-time microstructure indicators to drive execution behavior
- Discretion around trajectory to provide room to work passively and opportunistically get ahead

POV

- Tracks intra-day volume to trade in-line with market volume
- Provides discretion around trajectory (either as a function of order size or % of participation rate) to provide room to work passively and opportunistically get ahead
- Maintains ability to specify the Target, Min, and Max Participation Rates
