INTRODUCTION TO THE 2000 SUPPLEMENT TO THE 1993 ISDA COMMODITY DERIVATIVES DEFINITIONS

The 2000 Supplement to the 1993 ISDA Commodity Derivatives Definitions (the "Supplement") is intended for use in confirmations of individual transactions ("Confirmations") governed by agreements such as the 1992 ISDA Master Agreements (the "ISDA Master Agreements") published by the International Swaps and Derivatives Association, Inc. ("ISDA"). Copies of the ISDA Master Agreements are available from the executive offices of ISDA.

The Supplement is an update of the 1993 ISDA Commodity Derivatives Definitions (the "1993 Definitions"), which many participants in the over-the-counter commodity derivatives markets have incorporated into existing Confirmations or other agreements. The Supplement replaces Article 7 of the 1993 Definitions and can be incorporated into future Confirmations by reference to "the 1993 ISDA Commodity Derivatives Definitions (as supplemented by the 2000 Supplement)". As is the case with the 1993 Definitions, the Supplement is designed for use by participants in the markets for commodity derivatives transactions in documenting cash-settled commodity swaps, options, caps, collars, floors and swaptions or such other cash-settled commodity derivatives transactions as the parties desire. Existing Confirmations or other agreements that incorporate the 1993 Definitions will not, without further action by the parties, be affected by the use of the Supplement for future transactions.

The Supplement includes additional Commodity Reference Prices for Energy, Metals and Paper. The Supplement may not include all the Commodity Reference Prices available for a particular commodity and used by market participants. However, the Supplement adds significantly to the number of Commodity Reference Prices set forth in the 1993 Definitions and includes the Commodity Reference Price Framework from the 1993 Definitions, which facilitates the definition of a Commodity Reference Price that is not set forth in the Supplement. A discussion of how the Commodity Reference Price Framework can be utilized to define Reference Prices is set forth in the Practice Note below.

In addition to an expanded Commodity Reference Price Section, the Supplement allows parties to incorporate price materiality into the Price Source Disruption Event defined in Section 7.4. If a Price Materiality Percentage is specified in the related Confirmation, a Price Source Disruption Event will have occurred if the Specified Price for the relevant Commodity Reference Price differs from the Specified Price as determined in accordance with the Commodity Reference Price, "COMMODITY-REFERENCE DEALERS", by such Price Materiality Percentage.

Section 7.5 of the Supplement includes two new Disruption Fallbacks, "Fallback Reference Dealers" and "Postponement-Fallback Reference Price". Fallback Reference Dealers allows parties to determine the Relevant Price in accordance with the Commodity Reference Price, "COMMODITY-REFERENCE DEALERS". Postponement-Fallback Reference Price allows parties to postpone valuing a disrupted Transaction for consecutive

Commodity Business Days equal in number to the Maximum Days of Disruption specified by the parties in the related Confirmation.

The 1993 Definitions (as supplemented by the Supplement) may be updated or replaced in the future to include additional definitions and provisions. Future updates or replacements may modify substantive terms.

ISDA has provided these Definitions to assist the smooth and efficient functioning of privately negotiated derivatives activity by providing a common set of terms for parties to use in preparing Confirmations. *The precise documentation of each individual transaction remains, however, the responsibility of the parties concerned. ISDA assumes no responsibility for any use to which this Supplement may be put, including, without limitation, any use of this Supplement in connection with any privately negotiated derivative transaction. Each party to a transaction evidenced by a Confirmation referring to or incorporating this Supplement must satisfy itself that the Supplement is appropriate for the transaction, has been properly used and/or adapted in the Confirmation for the transaction and that the Confirmation has generally been properly drafted, in each case to reflect the commercial intentions of the parties.*

ISDA has not undertaken to review all applicable laws and regulations of any jurisdiction in which these Definitions may be used, and therefore parties are advised to consider the application of any relevant jurisdiction's regulatory, tax, accounting, exchange or other requirements that may exist in connection with the entering into and documenting of a privately negotiated derivative transaction.

PRACTICE NOTE

- **Commodity Reference Price Framework.** Section 7.1(d)(ii) of the Supplement anticipates that parties may want to use a Commodity Reference Price not defined in the Supplement. This Section is identical to Section 7.1(c)(ii) of the 1993 Definitions. The Commodity Reference Price Framework allows parties to specify a few key terms in order to tailor a Commodity Reference Price for use in the relevant agreement or Confirmation. The Commodity Reference Price Framework may also be useful if the details of a defined Commodity Reference Price change after the publication of the Supplement. The Framework set forth in Section 7.1(d)(ii)(A) should be followed where the relevant Commodity Reference Price is announced or published by an Exchange. Where the relevant Commodity Reference Price is announced or published by a source *other than* an Exchange, the Framework set forth in Section 7.1(d)(ii)(B) should be followed.

For example, the Commodity Reference Price "ELECTRICITY-COB-NYMEX"¹, a Reference Price definition published by an Exchange and added in the Supplement, could alternatively be specified using the Commodity Reference Price Framework by specifying the following information in the relevant Confirmation:

Commodity:	COB electricity
Unit:	MWH
Exchange:	NYMEX
Relevant Currency:	U.S. dollars
Specified Price: ²	Closing price
Delivery Date:	Dec. 22, 1999

Applying the Commodity Reference Price Framework to these specified terms, the price for a Pricing Date will be that day's Specified Price (closing price) per Unit (MMBTU) of that Commodity (COB electricity) on that Exchange (NYMEX) for delivery on that Delivery Date (in this example, Dec. 22, 1999), stated in that currency (U.S. dollars), as announced or published by that Exchange on that Pricing Date.

The Commodity Reference Price "NATURAL GAS-EAST (RELIANT)-INSIDE FERC"³ is a Reference Price definition added in the Supplement that is published by a source other than an Exchange. This Reference Price could alternatively be specified using the Commodity Reference Price Framework by specifying the following information in the relevant Confirmation:

¹ Section 7.1(a)(iii)(B) of the Supplement defines "ELECTRICITY-COB-NYMEX" to mean that the price for a Pricing Date will be that day's Specified Price per MWH of COB electricity on the NYMEX of the Futures Contract for the Delivery Date, stated in U.S. dollars, as made public by the NYMEX on that Pricing Date.

² The definition of Specified Price sets forth the different types of prices that can be specified.

³ Section 7.1(a)(xii)(B)(20) of the Supplement defines "NATURAL GAS-EAST (RELIANT)-INSIDE FERC" to mean that the price for a Pricing Date will be that day's Specified Price per MMBTU of natural gas for delivery on the Delivery Date, stated in U.S. dollars, published under the heading "Prices of Spot Gas Delivered to Pipelines (per MMBtu dry): Reliant Energy Gas Transmission Co.: East: Index" in the issue of Inside FERC that reports prices effective on the Pricing Date.

Commodity:	Natural Gas-East (Reliant)
Unit:	MMBTU
Price Source:	Inside FERC
Heading:	"Prices of Spot Gas Delivered to Pipelines (per MMBtu dry): Reliant Energy Gas Transmission Co.: East: Index"
Relevant Currency:	U.S. dollars
Specified Price:	Closing price
Delivery Date:	Jan. 19, 2000

Applying the Commodity Reference Price Framework to these specified terms, the price for a Pricing Date will be that day's Specified Price (closing price) per Unit (MMBTU) of that Commodity (Natural Gas-East (Reliant)) for delivery on that Delivery Date (in this example, Jan. 19, 2000), stated in that currency (U.S. dollars), published (or shown) in the issue of that Price Source (Inside FERC) that reports prices effective on that Pricing Date.

The above examples use Reference Prices that are defined in the Supplement to demonstrate the flexibility of the Commodity Reference Price Framework. For existing rates that are not defined in the Supplement and for rates that are developed in the future, the Commodity Reference Price Framework provides the flexibility to frame the Definitions to adapt. The Commodity Reference Price Framework also anticipates changes in publications and references.

2000 SUPPLEMENT TO THE 1993 ISDA COMMODITY DERIVATIVES DEFINITIONS

The following definitions and provisions replace the corresponding Sections of the 1993 ISDA Commodity Derivatives Definitions (as published by the International Swaps and Derivatives Association, Inc.). Any or all of the following definitions and provisions may be incorporated into a document by wording in the document indicating that, or the extent to which, the document is subject to the 1993 ISDA Commodity Derivatives Definitions (as supplemented by the 2000 Supplement). All definitions and provisions so incorporated in a document will be applicable to that document unless otherwise provided in that document, and all terms defined in this Supplement and used in any definition or provision that is incorporated by reference in a document will have the respective meanings set forth in this Supplement unless otherwise provided in that document. Any term used in a document will, when combined with the name of a party, have meaning in respect of the named party only.

(ii) **COMMODITY REFERENCE PRICE FRAMEWORK.** The parties may specify for any Transaction a Commodity Reference Price that is not set forth above by specifying in the relevant agreement or Confirmation:

(A) if that Commodity Reference Price is a price announced or published by an Exchange, (1) the relevant Commodity (including, if relevant, the type or grade of that Commodity, the location of delivery and any other details), (2) the relevant Unit, (3) the relevant Exchange, (4) the relevant currency in which the Specified Price is expressed and (5) the Specified Price and, if applicable, (6) the Delivery Date, in which case the price for a Pricing Date will be that day's Specified Price per Unit of that Commodity on that Exchange and, if applicable, for delivery on that Delivery Date, stated in that currency, as announced or published by that Exchange on that Pricing Date; and

(B) if that Commodity Reference Price is not a price announced or published by an Exchange, (1) the relevant Commodity (including, if relevant, the type or grade of that Commodity, the location of delivery and any other details), (2) the relevant Unit, (3) the relevant Price Source (and, if applicable, the location in that Price Source of the Specified Price (or the prices from which the Specified Price is calculated)), (4) the relevant currency in which the Specified Price is expressed and (5) the Specified Price and, if applicable, (6) the Delivery Date, in which case the price for a Pricing Date will be that day's Specified

Price per Unit of that Commodity and, if applicable, for that Delivery Date, stated in that currency, published (or shown) in the issue of that Price Source that reports prices effective on that Pricing Date.

Section 7.2. Certain Definitions Relating to Commodity Reference Prices.

(x) "OMLX" means OM London Exchange Ltd. or its successor.

(xi) "SIMEX" means The Singapore International Monetary Exchange, Inc. or its successor.

(c) General.

(i) "Commodity" means, in respect of a Transaction, the commodity specified in the relevant Commodity Reference Price or in the relevant Confirmation.

(ii) "Commodity Reference Price" means, in respect of a Transaction, any of the commodity reference prices specified in Section 7.1(a), (b) or (c) or determined pursuant to Section 7.1(d)(i) or (d)(ii).

(iii) "Delivery Date" means, in respect of a Transaction and a Commodity Reference Price, the relevant date or month for delivery of the underlying Commodity (which must be a date or month reported or capable of being determined from information reported in or by the relevant Price Source) as follows:

(A) if a date is, or a month and year are, specified in the relevant Confirmation, that date or that month and year;

(B) if a Nearby Month is specified in the relevant Confirmation, the month of expiration of the relevant Futures Contract; and

(C) if a method is specified for the purpose of determining the Delivery Date, the date or the month and year determined pursuant to that method.

(iv) "Delivery Point" means, with respect to any Transaction and a Commodity Reference Price, the relevant location for delivery of the underlying Commodity (which must be a location reported in or by, or capable of being determined from information reported in or by, the relevant Price Source) specified as such in the relevant Confirmation.

(v) "Exchange" means, in respect of a Transaction, the exchange or principal trading market specified in the relevant Confirmation or Commodity Reference Price.

(vi) "Futures Contract" means, in respect of a Commodity Reference Price, the contract for future delivery in respect of the relevant Delivery Date relating to the Commodity referred to in that Commodity Reference Price.

(vii) "MMBTU" and "mmbtu" each means one million British thermal units.

(viii) "MWH" and "mwh" each means megawatt hour.

(ix) "Nearby Month", when preceded by a numerical adjective, means, in respect of a Delivery Date and a Pricing Date, the month of expiration of the Futures Contract identified by that numerical adjective, so that, for example, (A) "First Nearby Month" means the month of expiration of the first Futures Contract to expire following that Pricing Date; (B) "Second Nearby Month" means the month of expiration of the second Futures Contract to expire following that Pricing Date; and (C) "Sixth Nearby Month" means the month of expiration of the sixth Futures Contract to expire following that Pricing Date.

(x) "Price Source" means, in respect of a Transaction, the publication (or such other origin of reference, including an Exchange) containing (or reporting) the Specified Price (or prices from which the Specified Price is calculated) specified in the relevant Commodity Reference Price or in the relevant Confirmation.

(xi) "Reference Dealers" means, with respect to any Transaction for which the relevant Commodity Reference Price is "COMMODITY-REFERENCE DEALERS", the four dealers specified in the relevant agreement or the Confirmation or, if dealers are not so specified, four leading dealers in the relevant market selected by the Calculation Agent.

(xii) "Specified Price" means, in respect of a Transaction and a Commodity Reference Price, any of the following prices (which must be a price reported in or by, or capable of being determined from information reported in or by, the relevant Price Source), as specified in the relevant Confirmation (and, if applicable, as of the time so specified): (A) the high price, (B) the low price, (C) the average of the high price and the low price, (D) the closing price, (E) the opening price, (F) the bid price, (G) the asked price, (H) the average of the bid price and the asked price, (I) the settlement price, (J) the morning fixing, (K) the afternoon fixing or (L) any other price specified in the relevant Confirmation.

(xiii) "Unit" means, in respect of a Transaction, the unit of measure of the relevant Commodity, as specified in the relevant Commodity Reference Price or Confirmation.

Section 7.3. Corrections to Published Prices. For purposes of determining the Relevant Price for any day, if the price published or announced on a given day and used or to be used by the Calculation Agent to determine a Relevant Price is subsequently corrected and the correction is published or announced by the person responsible for that publication or announcement within 30 calendar days of the original publication or announcement, either party may notify the other party of (i) that correction and (ii) the amount (if any) that is payable as a result of that correction. If, not later than 30 calendar days after publication or announcement of that correction, a party gives notice that an amount is so payable, the party that originally either received or retained such amount will, not later than three Business Days after the effectiveness of that notice, pay, subject to any applicable conditions precedent, to the other party that amount, together with interest on that amount (at a rate per annum that the Calculation Agent determines to be the spot offered rate for deposits in the payment currency in the London interbank market as at approximately 11:00 a.m., London time, on the relevant Payment Date or Settlement Date) for the period from and including the day on which a payment originally was (or was not) made to but excluding the day of payment of the refund or payment resulting from that correction.

Section 7.4. Market Disruption Events; Additional Market Disruption Events.

(a) "Market Disruption Event" or "Additional Market Disruption Event" means an event that, if applicable to a Transaction, would give rise in accordance with an applicable Disruption Fallback to an alternative basis for determining the Relevant Price in respect of a specified Commodity Reference Price or the termination of the Transaction were the event to occur or exist on a day that is a Pricing Date for that Transaction (or, if different, the day on which prices for that Pricing Date would, in the ordinary course, be published or announced by the Price Source).

(b) A Market Disruption Event or an Additional Market Disruption Event is applicable to a Transaction if it is specified in the relevant agreement or Confirmation or if, pursuant to Section 7.4(d), it is deemed to have been specified for that Transaction.

(c) For purposes of specifying that it is applicable to a Transaction (by using it in conjunction with the term "Market Disruption Event" or "Additional Market Disruption Event") and for purposes of Section 7.4(d), each of the following is a Market Disruption Event or Additional Market Disruption Event, as the case may be, with a meaning as follows:

(i) "Price Source Disruption" means (A) the failure of the Price Source to announce or publish the Specified Price (or the information necessary for determining the Specified Price) for the relevant Commodity Reference Price, (B) the temporary or permanent discontinuance or unavailability of the Price Source, (C) if the Commodity Reference Price is "COMMODITY-REFERENCE DEALERS", the failure to obtain at least three quotations as requested from the relevant Reference Dealers or (D) if a Price Materiality Percentage is specified in the Confirmation, the Specified Price for the relevant Commodity Reference Price differs from the Specified Price determined in accordance with the Commodity Reference Price

"COMMODITY-REFERENCE DEALERS" by such Price Materiality Percentage.

(ii) "Trading Suspension" means the material suspension of trading in the Futures Contract or the Commodity on the Exchange or in any additional futures contract, options contract or commodity on any exchange or principal trading market as specified in the relevant agreement or Confirmation.

(iii) "Disappearance of Commodity Reference Price" means (A) the failure of trading to commence, or the permanent discontinuation of trading, in the relevant Futures Contract on the relevant Exchange or (B) the disappearance of, or of trading in, the relevant Commodity.

(iv) "Material Change in Formula" means the occurrence since the Trade Date of the Transaction of a material change in the formula for or the method of calculating the relevant Commodity Reference Price.

(v) "Material Change in Content" means the occurrence since the Trade Date of the Transaction of a material change in the content, composition or constitution of the Commodity or relevant Futures Contract.

(vi) "*De Minimis* Trading" means that the number of contracts traded on the relevant Exchange on the day that would otherwise be a Pricing Date is fewer than the Minimum Futures Contracts.

(vii) "Tax Disruption" means the imposition of, change in or removal of an excise, severance, sales, use, value-added, transfer, stamp, documentary, recording or similar tax on, or measured by reference to, the relevant Commodity (other than a tax on, or measured by reference to overall gross or net income) by any government or taxation authority after the Trade Date, if the direct effect of such imposition, change or removal is to raise or lower the Relevant Price on the day that would otherwise be a Pricing Date from what it would have been without that imposition, change or removal.

(viii) "Trading Limitation" means the material limitation imposed on trading in the Futures Contract or the Commodity on the Exchange or in any additional futures contract, options contract or commodity on any exchange or principal trading market as specified in the relevant agreement or Confirmation.

The parties may specify in the relevant agreement or Confirmation other Market Disruption Events or Additional Market Disruption Events that they agree will apply to a transaction. Such an event should only be characterized as an Additional Market Disruption Event if it is intended that it will apply to the Transaction in addition to the events deemed to have been specified pursuant to Section 7.4(d)(i). The term "Inapplicable" when specified in conjunction with the term "Market Disruption Event" means that the calculation of a

Relevant Price will not be adjusted as a result of any Market Disruption Event (in which case there would also be no cause to specify any Additional Market Disruption Event).

(d) Unless the parties provide in the relevant agreement or Confirmation that the calculation of a Relevant Price will not be adjusted as a result of any Market Disruption Event,

(i) if the parties do not specify any Market Disruption Event in the relevant agreement or Confirmation, the following Market Disruption Events will be deemed to have been specified for a Transaction: (A) "Price Source Disruption", (B) "Trading Suspension", (C) "Disappearance of Commodity Reference Price", (D) "Material Change in Formula" and (E) "Material Change in Content";

(ii) if one or more Market Disruption Events are specified in the relevant agreement or Confirmation, then only the Market Disruption Events specified will apply to the Transaction; and

(iii) if one or more Additional Market Disruption Events are specified in the relevant agreement or Confirmation, then each such Additional Market Disruption Event, together with the Market Disruption Events deemed to have been specified pursuant to Section 7.4(d)(i), will apply to the Transaction.

(e) If the Calculation Agent, after consultation with the parties or the other party, determines in good faith that a Market Disruption Event or an Additional Market Disruption Event applicable to a Transaction has occurred or exists in respect of that Transaction on a day that is a Pricing Date for that Transaction (or, if different, the day on which prices for that Pricing Date would, in the ordinary course, be published or announced by the Price Source), the Relevant Price for that Pricing Date will be determined in accordance with the first applicable Disruption Fallback (applied in accordance with its terms) that provides the parties with a Relevant Price or, if there is no such Relevant Price, provides for the termination of the Transaction.

Section 7.5. Disruption Fallbacks. (a) "Disruption Fallback" means a source or method that, if applicable to a Transaction, may give rise to an alternative basis for determining the Relevant Price in respect of a specified Commodity Reference Price or the termination of the Transaction when a Market Disruption Event or an Additional Market Disruption Event occurs or exists on a day that is a Pricing Date for that Transaction (or, if different, the day on which prices for that Pricing Date would, in the ordinary course, be published or announced by the Price Source).

(b) A Disruption Fallback is applicable to a Transaction if it is specified in the relevant agreement or Confirmation or if, pursuant to Section 7.5(d), it is deemed to have been specified for that Transaction.

(c) For purposes of specifying that it is applicable to a Transaction (by using it in conjunction with the term "Disruption Fallback") and for purposes of Section 7.5(d), each of the following is a Disruption Fallback with a meaning as follows:

(i) "Fallback Reference Dealers" means that the Relevant Price will be determined in accordance with the Commodity Reference Price, "COMMODITY-REFERENCE DEALERS".

(ii) "Fallback Reference Price" means that the Calculation Agent will determine the Relevant Price based on the price for that Pricing Date of the first alternate Commodity Reference Price, if any, specified in the relevant agreement or Confirmation and not subject to a Market Disruption Event or an Additional Market Disruption Event.

(iii) "Postponement-Fallback Reference Price" means that the Pricing Date will be deemed to be the first succeeding Commodity Business Day on which the Market Disruption Event or Additional Market Disruption Event ceases to exist, unless that Market Disruption Event or Additional Market Disruption Event continues to exist (measured from and including the original day that would otherwise have been the Pricing Date) for consecutive Commodity Business Days equal in number to the Maximum Days of Disruption specified in the relevant Confirmation. In that case, (A) the last such consecutive Commodity Business Day will be the Pricing Date and (B) the Calculation Agent will determine the Relevant Price based on the price for that Pricing Date of the first alternate Commodity Reference Price, if any, specified in the relevant agreement or Confirmation and not subject to a Market Disruption Event or an Additional Market Disruption Event. If no such alternate Commodity Reference Price is specified, then the Relevant Price shall be determined in accordance with the Commodity Reference Price "COMMODITY-REFERENCE DEALERS".

(iv) "Negotiated Fallback" means that each party to a Transaction will, promptly upon becoming aware of the Market Disruption Event or Additional Market Disruption Event, negotiate in good faith to agree with the other on a Relevant Price (or a method for determining a Relevant Price), and, if the parties have not so agreed on or before the fifth Business Day following the first Pricing Date on which that Market Disruption Event or Additional Market Disruption Event occurred or existed, the next applicable Disruption Fallback shall apply to the Transaction.

(v) "No Fault Termination" means that the Transaction will be terminated in accordance with any applicable provisions set forth in the relevant agreement or Confirmation as if a "Termination Event" and an "Early Termination Date" (each as defined in the relevant agreement or Confirmation) had occurred on the day No Fault Termination became the applicable Disruption Fallback and there were two "Affected Parties" (as defined in the relevant agreement or Confirmation).

(vi) "Postponement" means that the Pricing Date will be deemed to be the first succeeding Commodity Business Day on which the Market Disruption Event or Additional Market Disruption Event ceases to exist, unless that Market Disruption Event or Additional Market Disruption Event continues to exist (measured from and including the original day that would otherwise have been the Pricing Date) for consecutive Commodity Business Days equal in number to the Maximum Days of Disruption. In that case, (A) the last such consecutive Commodity Business Day will be the Pricing Date and (B) the next Disruption Fallback specified in the relevant agreement or Confirmation will apply to the Transaction. If, as a result of a postponement pursuant to this provision, a Relevant Price is unavailable to determine the Floating Price for a Floating Amount payable on any Settlement Date or Payment Date, that Settlement Date or Payment Date will be postponed to the same extent as the Pricing Date and, if a corresponding Fixed Amount or Floating Amount would otherwise have been payable in respect of the same Transaction on the same date that the postponed Floating Amount would have been payable but for the postponement, the Settlement Date or Payment Date for that corresponding Fixed Amount or Floating Amount will be postponed to the same extent.

(vii) "Calculation Agent Determination" means that the Calculation Agent will determine the Relevant Price (or a method for determining a Relevant Price), taking into consideration the latest available quotation for the relevant Commodity Reference Price and any other information that in good faith it deems relevant.

(viii) "Average Daily Price Disruption" means that the price for the Pricing Date will not be included in the calculation of the Floating Amount, but if a Market Disruption Event or an Additional Market Disruption Event occurs or exists on more than the Maximum Days of Disruption during the relevant Calculation Period, then, for each Pricing Date during that Calculation Period on which a Market Disruption Event or an Additional Market Disruption Event occurred or existed, a price will be determined using the first alternate Commodity Reference Price, if any, specified in the relevant agreement or Confirmation.

The parties may specify in the relevant agreement or Confirmation other Disruption Fallbacks that they agree will apply to a Transaction.

(d) Unless the parties otherwise provide in the relevant agreement or Confirmation,

(i) if the parties do not specify any Disruption Fallback in the relevant agreement or Confirmation, the following Disruption Fallbacks will be deemed to have been specified (in the following order) for a Transaction: (A) "Fallback Reference Price" (if the parties have specified an alternate Commodity Reference Price), (B) "Negotiated Fallback" and (C) "No Fault Termination"; and

(ii) if one or more Disruption Fallbacks are specified in the relevant agreement or Confirmation, then only the Disruption Fallbacks specified will apply to the Transaction (in the order so specified).

(e) If a Market Disruption Event or an Additional Market Disruption Event occurs or exists on a day that would otherwise be a Pricing Date for the Transaction (or, if different, the day on which prices for that Pricing Date would, in the ordinary course, be published or announced by the Price Source) and none of the applicable Disruption Fallbacks provides the parties with a Relevant Price, the Transaction will terminate in accordance with "No Fault Termination".

Section 7.6. Certain Definitions Relating to Market Disruption Events and Additional Market Disruption Events. (a) "Maximum Days of Disruption" means, in respect of a Transaction, the number of Commodity Business Days specified as such in the relevant agreement or Confirmation.

(b) "Minimum Futures Contracts" means, in respect of a Transaction, the number of futures contracts specified as such in the relevant agreement or Confirmation.

(c) "Price Materiality Percentage" means, in respect of a Transaction, the percentage specified as such in the relevant agreement or Confirmation.
