The average liquidity maintenance ratio for the period 平均流動性維持比率

The average liquidity maintenance ratio is the simple average of each months' average maintenance liquidity ratio for the reporting period. 平均流動性維持比率是按照結算期間之每月平均流動性維持比率以簡易平均法計算。

The calculation of the average liquidity maintenance ratio is in accordance with the guidelines of Hong Kong Monetary Authority and the Hong Kong Banking Ordinance, 平均流動性維持比率之計算符合香港金融管理局訂定之綜合基準,及香港銀行業條例。

Liquidity Risk Management

流動資金風險管理

The Branch's liquidity risk appetite is that it will, at all times, maintain liquidity to meet all financial needs, including new business opportunities, on a commercially viable basis in "normal course of business" conditions, The Branch will additionally maintain a prudent degree of protection to mitigate the effects of extreme, but plausible adverse events on its daily operations and its financial condition,

The Liquidity Management Framework ("LMF") is the primary internal policy document that provides direction to the Branch's businesses and functions on the management of liquidity and sets clear governance process. It is updated by the Group's Corporate Treasury and approved by the Asset and Liability Committee ("ALCO"). The Branch also has a suite of liquidity policies including a local Liquidity Management Framework, Liquidity Contingency Plan and Liquidity Stress Testing Policy.

The LMF identifies 6 key pillars of liquidity management: funding access, funding requirements, liquidity assets, liquidity contingency planning, liquidity transfer pricing and management information. In parallel, 3 types of liquidity risks are identified, along which risk identification, measurement and mitigating strategies are deployed: structural, tactical and contingency.

The Risk Committee and ALCO share management oversight responsibility for liquidity management, Corporate Treasury is responsible for maintaining and implementing the LMF. The Branch's liquidity is managed by the Treasury Market Services ("TMS") business. Independent oversight is provided by the Market Risk Team.

On daily basis, Finance calculates the liquidity maintenance ratio and a stressed liquidity maintenance ratio, in accordance with the Banking Ordinance, and reports to TMS business. Corporate Treasury produces a daily cash-flow report for the TMS business detailing liquidity positions of the Branch. Cash-flow limits are monitored daily against established limits. Liquidity Cushion and Liquidity Stress Testing are performed by Corporate Treasury.
